# App Layout
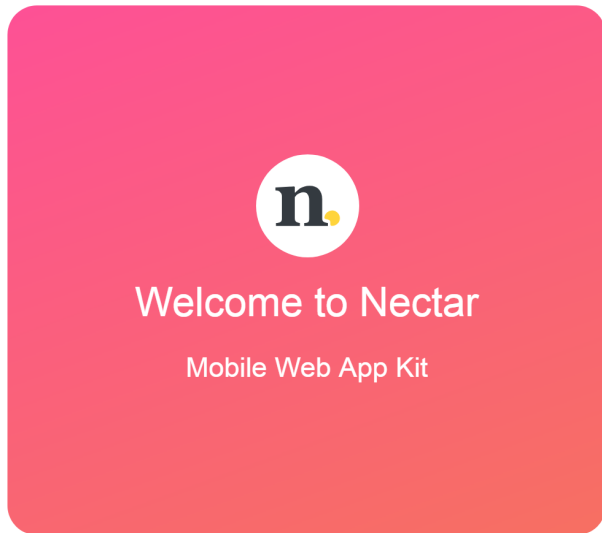

As Nectar has Single Page Application (SPA) architecture, the app shell layout is defined inside index.html

## Navigation Layouts

Nectar supports two main navigation layouts widely used in apps — Hamburger and Tab Bar.

Utilities

Hamburger Layout

Tab Bar Layout

## Setting up Hamburger Layout

By default, Hamburger layout is set up for Nectar.

1. Open `/assets/custom/js/config.js` file.

2. Inside `window.config.theme = {` set `navigation: 'hambuger'`

3. Open `index.html` file.

4. Uncomment HTML inside `<!-- Hamburger Navigation -->`

5. Comment HTML inside `<!-- Tab Bar Navigation -->`

## Setting up Tab Bar Layout

1. Open `/assets/custom/js/config.js` file.

2. Inside `window.config.theme = {` set `navigation: 'tabbar'`

3. Open `index.html` file.

4. Uncomment HTML inside `<!-- Tab Bar Navigation -->`

5. Comment HTML inside `<!-- Hamburger Navigation -->`

> (i) You can use only one type of navigation layout at a time, either Hamburger or Tab Bar.
>
> Push State (#!) does not work for Tab Bar Layout.
